QUESTION 1

Which of the following topologies are supported by OperationCenter? (Multiple Choice)

- A. Physical topology
- B. Logical topology
- C. Service topology
- D. Network topology

Correct Answer: ABCD

QUESTION 2

Nova is a core service of FusionSphere OpenStack. Many other components are split from the Nova project and serve Nova; All activities in the lifecycle of FusionSphere OpenStack VM instances are processed by Nova.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 3

Virtualization antivirus software is installed in which of the following VMs?

- A. Security VM
- B. Guest VM
- C. Host VM
- D. User VM

Correct Answer: A

QUESTION 4

Which of the following statements is correct about the division of responsibilities in a data center service migration project?

- A. During the project implementation, the project implementer is responsible for progress management, risk control quality management, subcontract management, construction management, contract change confirmation, and engineering delivery.
- B. During the project implementation, the customer must provide necessary resources to ensure power supply,

refrigerating, lighting, firefighting, equipment room protection, network bandwidth, applying for contract changes, migration personnel arrangement, and so on.

C. Common responsibilities refer to the work that requires both parties to confirm or to complete together during the project implementation.

D. During the project implementation, the migration implementer is responsible for confirming the project progress, acceptance criteria, hardware installation environment, and device quantity.

Correct Answer: D

QUESTION 5

Which of the following statements is incorrect about the relationship between PaaS and SaaS?

A. PaaS is targeted at application program developers, and SaaS is targeted at Internet users and small-and medium-sized enterprises.

B. PaaS is a technology to implement SaaS.

C. Cloud computing can only provide the SaaS services or PaaS services at the same time.

D. PaaS and SaaS are complementary and facilitate each other.

Correct Answer: C

QUESTION 6

Which of the following may cause communication between VMs out of the network security control?

A. Most of the cyber security systems cannot identify the traffic of the encrypted VMs.

B. Communication between VMs in a server is not perceived by physical security devices.

C. VM images use the tools that can enable communication between VMs to bypass firewalls.

D. The client operating system can activate the secret mode.

Correct Answer: B

QUESTION 7

Which of the following functions is configured from Operation Center to an interconnected system to allow users to log in to the interconnected system through My Link on OperationCenter without entering the user name and password?

A. Resource management

B. Routine monitoring

C. SSO

D. Real-time monitoring

Correct Answer: C

QUESTION 8

Which of the following statements is incorrect about the Configuration Management System (CMS)?

- A. CMS is a part of the service knowledge management system.
- B. CMS must contain all service data covering employees, providers, location, service units, customers, and users.
- C. CMS contains tools used to collect, store, manage, upgrade, and display configuration items and their relationships.
- D. CMS contains information of events, problems, known issues, changes, and release.

Correct Answer: B

QUESTION 9

Which of the following are the mainstream visualization platforms that can be managed by ManageOne? (Multiple Choice)

- A. FusionCompute
- B. VMware vSphere
- C. Hyper-V
- D. FusionSphere OpenStack

Correct Answer: ABD

QUESTION 10

Which of the following are physical deployment modes of eSight? (Multiple Choice)

- A. Single-server deployment
- B. Distributed deployment
- C. Local HA system
- D. Remote HA system

Correct Answer: ABCD

QUESTION 11

Which of the following third-party storage vendors are supported by eSight? (Multiple Choice)

- A. NetApp
- B. IBM
- C. EMC
- D. HP

Correct Answer: ABCD

QUESTION 12

ServiceCenter is deployed on a VM created on the host of the management cluster. If ServiceCenter is deployed in active/standby mode, the active and standby VMs are separately deployed on the two hosts of the management cluster.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 13

Data center DR levels include application-level DR, data-level DR, and media-level DR and backup.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 14

Which of the following methods can be used to create VMs in FusionCompute? (Multiple Choice)

- A. Create a bare VM.
- B. Create a VM using an image file.
- C. Create a VM using a template.
- D. Use an existing VM to clone a VM.

Correct Answer: ACD

QUESTION 15

Which of the following statements is incorrect about the FusionSphere OpenStack OM resource pool configuration?

- A. You must first specify the availability zone (AZ) to which the host group belongs and then select hosts from the AZ to create a host group.
- B. If the resource pool is to interconnect with FusionCompute, the AZ needs to be consistent with the AZ configured in the FusionCompute storage cluster.
- C. The external network is used to connect to the network outside the system and cannot be the Internet.
- D. fc-nova-computeXXX is in fact a group of FusionCompute computing clusters interconnected with FusionSphere OpenStack.

Correct Answer: C
