QUESTION 1

How can testers create functional performance, and application security defects in the HP Quality Center?

- A. by using the defect submission and reporting wizard found in QCE
- B. manually or directly from the execution of manual and automated tests
- C. by importing a list in a pdf file
- D. only through the execution of automated tests

Correct Answer: B

QUESTION 2

What does HP ALM eliminate?

- A. silos, manual testing, the need for automation
- B. manual testing, collaboration, war room meetings
- C. islands, point tools, brute force
- D. clusters, clouds, brute force

Correct Answer: C

QUESTION 3

During performance testing, which solution capabilities allow testers to identify and eliminate performance bottlenecks?

- A. defect tracking, reporting, and diagnostics
- B. test planning, scheduling, and execution
- C. monitoring, analysis, and diagnostics
- D. real-time reporting in Quality Center

Correct Answer: C

QUESTION 4

How does HP Service Virtualization improve software delivery?

- A. By making virtualization a standard part of the testing process, designers ensure that developers are on hand to assist in case anything goes wrong during regression testing.

- B. By virtualizing services when needed, test designers can automate steps, reuse test components, and validate modern mobile and composite applications at a faster rate
- C. By virtualizing services, the number of people needed to conduct functional or regression testing of the software is reduced
- D. By introducing virtualization, stakeholders are assured that the IT organization's goals are clearly aligned with the goals of the business.

Correct Answer: A

QUESTION 5

What is a business challenge of Agile as a software delivery model?

- A. increasing the number of sprints completed in the software development lifecycle
- B. making large development teams more effective with structured processes and IT alignment
- C. enabling an organization to achieve a balance of speed and value at a sustainable pace of delivery
- D. focusing on developers and their need for integrated testing of applications at an accelerated burn down rate

Correct Answer: B

QUESTION 6

Which capability enables users to take advantage of the benefits of a framework, such as test component reuse, faster test creation, and reduced test maintenance?

- A. integrating HP Sprinter with HP ALM
- B. using HP Sprinter to conduct exploratory testing
- C. integrating HP Sprinter with HP Quality Center
- D. integrating HP Sprinter manual tests with HP Business Process Testing

Correct Answer: D

QUESTION 7

Which discovery question will likely assist in understanding an organization's pain point that can be addressed by an HP Lifecycle Management solution?

- A. Is it difficult for the organization to monitor application performance and availability in real time?
- B. Are organizational silos impeding the process of planning, delivery, and hand off to operations?
- C. Can project and portfolio management be leveraged to improve business results?

D. Is it difficult for the organization to monitor user mobile application performance and availability in real time?

Correct Answer: B

QUESTION 8

A prospective client questions the need for development tools in order for an HP ALM solution to be viable. What is the most appropriate response?

- A. Explain that the HP Agile Manager tool integrates with ALM and is available for SaaS or on premise delivery.
- B. Provide the prospective client with ROI metrics that show significant improvements in on- time delivery and lower total cost of ownership.
- C. Explain that HP provides development integrations for a single view of core lifecycle activities and is both technology and methodology agnostic.
- D. Explain that the HP ALM solution is mature and has a significant market share compared to the competition.

Correct Answer: D

QUESTION 9

Which most accurately describes the HP Application Lifecycle Management suite?

- A. a unified software suite for accelerating the delivery of secure, reliable, modern applications
- B. a product used to manage test requirements through application delivery
- C. a solution that allows management of application lifecycle as a business process
- D. a suite of stand-alone tools for accelerating the delivery of secure, reliable, modern applications

Correct Answer: A

QUESTION 10

Which capabilities allow HP Performance Center to load test applications in and from the cloud?

- A. local test requirements
- B. cloud-based analytics
- C. HP Anywhere
- D. cloud-based load generators

Correct Answer: B
