QUESTION 4

When adding an Active Directory server as an authentication source in ClearPass, what is the purpose of the 'Search Base DN\` feature?

- A. to indicate to ClearPass the node in the AD tree structure where it should start to search for records
- B. to find the distinguished name of a particular user in Active Directory
- C. to indicate to Clear Pass the Active Directory domain to append to the username
- D. to find the base DN of a particular user in Active Directory
- E. to search for AD user and group account to authenticate users from ClearPass

Correct Answer: A

Reference: https://www.arubanetworks.com/techdocs/ClearPass/Aruba_DeployGd_HTML/Content/Active%20Directory/AD_auth_source_adding.htm

QUESTION 5

Which statement most accurately describes how users with Active Directory credentials authenticate with ClearPass when Active Directory is used as an authentication source for an 802.1x service in ClearPass?

- A. A Kerberos request is sent from the Network Access Device to ClearPass which initiates a RADIUS request to the AD server.
- B. A RADIUS request is sent from the Network Access Device to the AD server which communicates with ClearPass.
- C. An LDAP request is sent from the Network Access Device to the AD server which communicates with ClearPass.
- D. An LDAP request is sent from the Network Access Device to ClearPass which initiates a RADIUS request to the AD server.
- E. A RADIUS request is sent from the Network Access Device to the ClearPass which communicates with the AD server.

Correct Answer: C

QUESTION 6

What is the purpose of a guest self-registration page in ClearPass?

- A. to allow employees to get their own devices securely connected to the network

- B. to allow contractors to create their own accounts in Active Directory
- C. to allow employees\' sponsors to create accounts for their guests
- D. to allow employees to easily get their corporate devices on the network
- E. to allow guest users to create a login account for the web login page

Correct Answer: B

Guest self-registration allows an administrator to customize the process for guests to create their own visitor accounts. Self-registration is also referred to as self-provisioned access

Reference <http://www.arubanetworks.com/techdocs/ClearPass/6.6/Guest/Content/Configuration/CustomizingSelfProvisionedAccess.htm>
