You have just started working at a large organization. You have been asked to sign a code of conduct as well as a

contract. What does the organization wish to achieve with this?

- A. A code of conduct helps to prevent the misuse of IT facilities.
- B. A code of conduct is a legal obligation that organizations have to meet.
- C. A code of conduct prevents a virus outbreak.
- D. A code of conduct gives staff guidance on how to report suspected misuses of IT facilities.

Correct Answer: A

QUESTION 9

Which of the following measures is a corrective measure?

- A. Incorporating an Intrusion Detection System (IDS) in the design of a computer center
- B. Installing a virus scanner in an information system
- C. Making a backup of the data that has been created or altered that day
- D. Restoring a backup of the correct database after a corrupt copy of the database was written over the original

Correct Answer: D

QUESTION 10

Why is compliance important for the reliability of the information?

- A. Compliance is another word for reliability. So, if a company indicates that it is compliant, it means that the information is managed properly.
- B. By meeting the legislative requirements and the regulations of both the government and internal management, an organization shows that it manages its information in a sound manner.
- C. When an organization employs a standard such as the ISO/IEC 27002 and uses it everywhere, it is compliant and therefore it guarantees the reliability of its information.
- D. When an organization is compliant, it meets the requirements of privacy legislation and, in doing so, protects the reliability of its information.

Correct Answer: B
