QUESTION 1

The recommended way to implement a service wrapper hook that customizes the `authenticateByScreenName()` method of the User service using a class called `com.sample.MyUserLocalServiceImpl` is to: (Please select all correct answers.)

- A. Add the following to `liferay-hook.xml`: `com.liferay.portal.service.UserLocalService`
`com.sample.MyUserLocalServiceImpl`
- B. Copy all of the methods from `UserLocalServiceImpl` to `MyUserLocalServiceImpl`
- C. Override the `authenticateByScreenName()` method in `MyUserLocalServiceImpl`
- D. Add the following to `liferay-plugin-package.properties`: `required-deployment-contexts=UserLocalService`
- E. Implement custom logic and call `super.authenticateByScreenNameQ` if applicable

Correct Answer: ACE

QUESTION 2

The recommended way to add a custom class to Liferay's startup process is to:

- A. Create a `portal-ext.properties` file in the Liferay Home directory that adds the custom class to `global.startup.events`, and add the custom class to the deployed Liferay application
- B. Create an Ext plugin that replaces the value of `global.startup.events` with the custom class, and add the custom class to the plugin
- C. Create a `portal-ext.properties` file in the Liferay Home directory that replaces the value of `global.startup.events` with the custom class, and add the custom class to `portal-impl.jar`
- D. Create an Ext plugin that adds the custom class to `global.startup.events`, and add the custom class to the plugin

Correct Answer: D

QUESTION 3

The element that defines a database table in `service.xml` is:

- A.
- B.
- C.
- D.

Correct Answer: A

QUESTION 4

Advantages of hook plugins over Ext plugins include: (Please select all correct answers.)

- A. A hook plugin is hot deployable, while an Ext plugin is not
- B. A hook plugin has direct access to the portal class loader, while an Ext plugin does not
- C. A hook plugin provides an easier upgrade path for overriding core services and JSPs
- D. A hook plugin can modify service layer classes, while an Ext plugin cannot

Correct Answer: AC

QUESTION 5

To customize the default success message displayed by MVCPortlet:

- A. Add a custom key to the SessionMessages object
- B. Override the language key default-success-message in Language.properties
- C. Provide a entry in liferay-portlet.xml
- D. Pass a parameter called '\\success\\' in the ActionURL and map it to a custom language key

Correct Answer: A

QUESTION 6

The recommended way to share language keys across portlet applications is:

- A. Create a resource bundle in one portlet and declare a dependency in the other portlets
- B. Create an Ext plugin with the language keys from all of the portlets
- C. Create a symbolic link in the portlets pointing to an external resource bundle
- D. Create a hook plugin containing language keys from all of the portlets

Correct Answer: D

QUESTION 7

The JavaScript method that executes as soon as the HTML document has finished loading is:

- A. AUI().ready(fn)
- B. Liferay.Portlet.ready(fn)
- C. Liferay.on(fn)

D. None of the above

Correct Answer: A

QUESTION 8

Liferay's core remote services: (Please select all correct answers.)

- A. Can only return primitive types
- B. Perform permission checking
- C. Must be invoked through web services
- D. Are accessed through Java or web services

Correct Answer: BD

QUESTION 9

The method to embed a portlet in a theme is:

- A. `$theme.addPortlet()`
- B. `$theme.runtime()`
- C. `$theme.embedPortlet()`
- D. `$theme.processPortlet()`

Correct Answer: B

QUESTION 10

The descriptor `liferay-hook.xml` defines the location to override a core JSP using:

- A.
- B.
- C.
- D.
- E.

Correct Answer: C

QUESTION 11

When adding new users to Liferay, the form will display the Details, Organizations and Personal Site sections based on the following property in portal.properties:

```
users.form.add.main =details,organizations,personal-site
```

The "users.form.add.main" property is listed in the liferay-hook_6_l_0.dtd as a portal property that can be overridden with a hook. Deploying a hook with the following property in the portal.properties file will remove the Personal Site

section:

```
users.form.add.main =details,organizations
```

- A. True
- B. False

Correct Answer: B

QUESTION 12

After adding new functionality to an Ext plugin, the recommended way to deploy in a development environment is to:

- A. Stop the server, redeploy the plugin and restart the server
- B. Undeploy the original plugin and deploy the updated plugin
- C. Undeploy the original plugin, clean the server and deploy the updated plugin
- D. Undeploy all plugins and deploy the updated plugin prior to redeploying the other plugins

Correct Answer: A

QUESTION 13

Portlets can use interportletcommunication to: (Please select all correct answers.)

- A. Pass any serializable object as an event payload
- B. Trigger multiple events
- C. Invoke events directly from the render phase
- D. Enforce the processing order of events

Correct Answer: AB

QUESTION 14

After a portlet completes the action phase:

- A. Only that portlet enters the render phase

- B. All portlets on the page enter the render phase
- C. Any portlet whose data has changed enters the render phase
- D. Nothing happens since the render phase occurs before the action phase

Correct Answer: B

QUESTION 15

The recommended way to cleanly redeploy an Ext plugin is to: A. Remove the plugin WAR file from the server and redeploy

- B. Set ext.redeploy.enabled to `\\\\"true\\\\"`
- C. Remove the ext-plugin-[nameof plugin].xml file in the deployed Liferay application and redeploy
- D. Start from a clean instance of the server and redeploy

Correct Answer: D
