QUESTION 1

DRAG DROP

You need to ensure that data security requirements are met.

Which security feature should you recommend? To answer, drag the appropriate features to the correct requirements. Each security feature may be used once, more than once, or not at all. You may need to drag the split bar between panes

or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Security feature	Requirement	Security feature
Field-level security		
Security roles	Charges	
Office 365 Groups	Inmate's views	
Business Units		

Correct Answer:

Answer Area

Security feature	Requirement	Security feature
	Charges	Security roles
Office 365 Groups	Inmate's views	Field-level security
Business Units		

Explanation:

1.

The chiefs want stakeholders to be able to see reports without needing to log in to Dynamics 365

2.

Only the chiefs should be able to see the charges against the inmates.

3.

Inmates will not continue to upload homework to SharePoint, but the homework needs to be accessible within Dynamics 365.

4.

Inmates must see only the registration form when registering for a class.

5.

Chiefs should see all registration forms.

Charges: Security roles

A security role defines how different users, such as salespeople, access different types of records. To control access to data, you can modify existing security roles, create new security roles, or change which security roles are assigned to

each user. Each user can have multiple security roles.

Security role privileges are cumulative: having more than one security role gives a user every privilege available in every role.

Each security role consists of record-level privileges and task-based privileges.

Inmate's views: Field-level security

Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system

administrator performs the following tasks.

1.

Enable field security on one or more fields for a given entity.

2.

Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

QUESTION 2

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a

unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

In preparation for a Dynamics 365 Sales and Dynamics 365 Customer Service implementation a client is performing a fit-gap analysis.

You need to evaluate the requirements by using a fit-gap methodology in the context of Dynamics 365 Sales and Dynamics 365 Customer Service.

Solution: Quotes and Orders need to push and receive data in real-time from SAP.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

A company plans to implement Dynamics 365 Sales. The company stores data about book locations in the fields, room, and shelf.

The company must import legacy data into the new system. Legacy data must be modified to match the current system design.

You need to recommend a solution to combine the room and shelf fields into a single field on import.

Which tool should you recommend?

- A. Data Import Wizard
- B. web services
- C. Microsoft Excel Online
- D. import from CSV

Correct Answer: A

QUESTION 4

DRAG DROP

An organization is implementing Dynamics 365 Customer Service.

The sales team wants to be able to customize some of the settings used in the business process flows.

You need to identify whether a business process flow will support the customizations.

Which customizations will work correctly? To answer, drag the appropriate tool to the correct data type. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Validity

Customization

Validity

True

Hide required form items in a process flow.

False

Use a value from a business rule in a process flow.

Correct Answer:

Answer Area

Validity

Customization

Validity

Hide required form items in a process flow.

False

Use a value from a business rule in a process flow.

True

QUESTION 5

DRAG DROP

You are designing a Dynamics 365 Sales solution that will be deployed to two separate companies on the same Microsoft Office 365 tenant: Contoso, Ltd and Contoso Pharmaceuticals,

The solution must meet the following security requirements:

1.

Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.

2.

Restrict access to Lead and Opportunities entities within their company.

3.

Restrict access to certain forms in an entity.

4.

Restrict access to certain fields on a form.

What should you recommend? To answer, drag the appropriate security types to the correct restrictions. Each security type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Security types Restriction Security type

<input type="text" value="Role"/>	Organization	<input type="text"/>
<input type="text" value="Team"/>	Entity	<input type="text"/>
<input type="text" value="Group"/>	Form	<input type="text"/>
<input type="text" value="Profile"/>		

Correct Answer:

Answer Area

Security types Restriction Security type

<input type="text" value="Role"/>	Organization	<input type="text" value="Role"/>
<input type="text" value="Team"/>	Entity	<input type="text" value="Role"/>
<input type="text" value="Group"/>	Form	<input type="text" value="Role"/>
<input type="text" value="Profile"/>		

QUESTION 6

DRAG DROP

A client plans to upgrade several solutions in the Dynamics 365 Customer Service application.

You need to recommend which upgrade option will achieve the outcome.

Which method should you use? To answer, drag the appropriate options to the correct outcomes. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Options	Outcome	Option
Upgrade	Patch the case entity solution and roll up previous patches in one step.	
Stage for Upgrade	Patch the case entity solution but do not delete previous versions at this point.	
Update	Patch the case entity solution and replace the previous solution.	

Correct Answer:

Answer Area

Options	Outcome	Option
	Patch the case entity solution and roll up previous patches in one step.	Upgrade
	Patch the case entity solution but do not delete previous versions at this point.	Stage for Upgrade
	Patch the case entity solution and replace the previous solution.	Update

QUESTION 7

A client that uses Dynamics 365 Sales has forms with both Business Rules and JavaScript added to handle the

business logic on the form.

The form contains logic that cannot be handled by Business Rules. The combination of using both Business Rules and JavaScript is now too complex to maintain.

You need to recommend a simplified form setup so the form can be maintained moving forward.

Which two should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Remove the Business Rules and use only JavaScript.
- B. Evaluate whether complex parts of the logic can be solved by using Power Apps Component Framework (PCF) control. Use Business Rules for the remaining functionality.
- C. Manage the business logic with a Power Apps Component Framework (PCF) control.
- D. Update logic to ensure Business Rules are optimized. Use JavaScript for the remaining functionality.

Correct Answer: AC

QUESTION 8

DRAG DROP

You are designing a business continuity strategy for a client who is using Dynamics 365 Sales.

The client works with critical data where any data loss creates a high risk.

You need to document the failover process for the stakeholders.

In which order should you recommend the actions be performed? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Answer Area

- If the second call is successful, the application continues normally.
- The application redirects calls to the established backup datacenter.
- The application redirects calls to an on-premises server.
- The application receives an exception after attempting the service call.
- The application automatically tries the call again.
- The application makes a service call to the datacenter.

Correct Answer:

Actions	Answer Area
	The application makes a service call to the datacenter.
The application redirects calls to an on-premises server.	The application receives an exception after attempting the service call.
	The application redirects calls to the established backup datacenter.
	The application automatically tries the call again.
	If the second call is successful, the application continues normally.

QUESTION 9

An architect is planning a security strategy within Dynamics 365 Sales.

The sales manager has a requirement that non-administrators have the ability to create and update the Sales Rep form field.

You need to identify the account types that can be assigned Field security profiles.

Which two account types can be used? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. User
- B. Service
- C. System
- D. Teams

Correct Answer: AD

Reference: <https://docs.microsoft.com/en-us/power-platform/admin/add-teams-users-field-security-profile>

QUESTION 10

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You want to integrate Microsoft Teams with Dynamics 365 Customer Service.

You install both apps, but Teams is not working when in Dynamics 365 Customer Service.

You need to troubleshoot the situation.

Solution: Change the options to Yes in the System settings of Dynamics 365 Customer Service.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

Reference: <https://msdynamicsworld.com/story/integrate-dynamics-365-customer-engagement-apps-microsoft-teams>

QUESTION 11

DRAG DROP

Your company is implementing Dynamics 365 Customer Service. You are part of the project team that meets weekly to review implementation progress and troubleshoot.

During the weekly project management meeting, you receive the following updates from developers:

1.

Versions of exported solution.zip files are being stored in source control.

2.

Solution segmentation is not being practiced with first-party solution integrations.

3.

Each independent solution is using a unique publisher.

4.

Solution versions are not being updated.

You need to identify the common risk for each item.

Which common risk is represented? To answer, drag the appropriate risks to the correct developer updates. Each risk may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Risks	Developer update	Risk
Lack of good solution version control practices	Versions of exported solution zip files are being stored in source control.	
Incompatible components compatible across solutions	Solution segmentation is not being practiced with first-party solution integrations.	
Solution dependency version mismatch between environments	Each independent solution is using a unique publisher.	

Correct Answer:

Answer Area

Risks	Developer update	Risk
	Versions of exported solution zip files are being stored in source control.	Lack of good solution version control practices
	Solution segmentation is not being practiced with first-party solution integrations.	Solution dependency version mismatch between environments
	Each independent solution is using a unique publisher.	Incompatible components compatible across solutions

QUESTION 12

DRAG DROP

You are implementing Dynamics 365 Customer Service for your company.

The company is deciding whether to use an on-premises or online implementation. One of the biggest concerns is about disaster recovery processes.

You need to explain how each system would be recovered with minimal effort and loss of data in case of a disaster.

Which recovery method should you use? To answer, drag the appropriate recovery methods to the correct location. Each recovery method may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Recovery methods

Back up databases to Microsoft Azure daily and then restore to new servers.

Promote Sandbox to production.

Use an included feature.

Replicate the environment weekly to backup servers.

Location

On-premises

Online

Recovery method

Correct Answer:

Answer Area

Recovery methods

Promote Sandbox to production.

Replicate the environment weekly to backup servers.

Location

On-premises

Online

Recovery method

Back up databases to Microsoft Azure daily and then restore to new servers.

Use an included feature.
