QUESTION 1

An administrator needs to limit multifactor authentication (MFA) factor type enrollment to end users located in a corporate office. Is this the feature that the administrator should use to set the corporate office perimeter?

Solution: Network zones

A. Yes

B. No

Correct Answer: B

QUESTION 2

Is this a source from which attributes can be directly imported into Universal Directory?

Solution: Unformatted text file

A. Yes

B. No

Correct Answer: B

QUESTION 3

Is this the expected outcome when both Identity Provider (IdP) initiated flow and Service Provider (SP) initiated flow are configured and required for an application?

Solution: The end user can choose to authenticate through Okta or through the application with user name and password.

A. Yes

B. No

Correct Answer: A

Explanation: Once the user is redirected to Okta they'll need to enter their Okta credentials, unless they had already authenticated into Okta in a previous session within the same browser. In either case, a successful authentication request will redirect the user back to the SP's Assertion Consumer Service (ACS) URL with an embedded SAML response from Okta. At a minimum, the response will: Indicate that it is indeed from Okta and hasn't been altered, and contain a digital signature proving such. This signature will be verified by the SP using a public key from Okta that was previously uploaded to the SP as a certificate. Indicate that the user has authenticated successfully into Okta Indicate who the user is via the NameID, a standard attribute used in SAML assertions.

QUESTION 4

Is this an action that an Okta Administrator can take during the application request workflow? Solution: Send a request back to the requester

A. Yes

B. No

Correct Answer: A

QUESTION 5

Does this Okta agent support provisioning?

Solution: Integrated Windows Authentication (IWA) Agent

A. Yes

B. No

Correct Answer: B

QUESTION 6

Is this an expected behavior when an incremental import is performed from Active Directory? Solution: All users are imported.

A. Yes

B. No

Correct Answer: A

QUESTION 7

Is this an Okta setting an end user can change? Solution: Security Image

A. Yes

B. No

Correct Answer: B

QUESTION 8

Is this a valid use of a group in Okta? Solution: Assign application access

A. Yes

B. No

Correct Answer: B

QUESTION 9

Is this the way to search for an application that supports a federated service in the Okta integration Network (OIN)?

Solution: Use the Supports SAML filter

A. Yes

B. No

Correct Answer: A

Explanation: https://help.okta.com/en/prod/Content/Topics/Apps/Apps_Apps.htm

QUESTION 10

Is this an Okta setting an end user can change? Solution: Forgotten Password Question

A. Yes

B. No

Correct Answer: B

QUESTION 11

Is this a reason why SAML is more secure than Secure Web Authentication (SWA)? Solution: SAML stores the user name and password in the assertion.

A. Yes

B. No

Correct Answer: B

QUESTION 12

Is this a task that can be performed by an Okta Administrator who has been assigned the Super Administrator role?

Solution: Edit profiles

A. Yes

B. No

Correct Answer: B

QUESTION 13

Is this an expected behavior when an incremental import is performed from Active Directory? Solution: Only the groups are imported

- A. Yes
- B. No

Correct Answer: B

QUESTION 14

Is this where an Okta Administrator should submit a case? Solution: <https://help.okta.com>

- A. Yes
- B. No

Correct Answer: B

Explanation: Okta Help Center To access the Okta Help Center, simply log into your Okta Admin Console and click the 'Help and Support' link located in the upper-right corner of the page. The Help Center acts as a one-stop-shop where you can: Search knowledge articles Ask questions in the community Submit a case to Support by clicking the 'Open a Case' button Join groups (Okta recommends that admins join the 'Admin Pro Tips' group where we post regular content such as onboarding materials, new feature videos, webinars, and more)
