-  **800,000+** Satisfied Customers

QUESTION 1

A customer interested in Panorama is concerned about managing multiple firewalls they are putting in place globally. Each location has its own IP addresses, zones, and VPN configurations.

Which element of Panorama will assist the customer in pushing this unique configuration information to the individual firewalls?

- A. device profile
- B. GlobalProtect
- C. templates
- D. device groups

Correct Answer: C

QUESTION 2

Which subscription should be activated when a predefined, known malicious IP address is updated?

- A. WildFire
- B. Cortex Data Lake
- C. Threat Prevention
- D. URL Filtering

Correct Answer: D

QUESTION 3

Which section of a Security Lifecycle Review (SLR) report summarizes risk exposure by breaking down a detected attack on the network?

- A. Advanced URL Filtering Analysis
- B. SaaSApplications
- C. Threats at a Glance
- D. Applications that Introduce Risk

Correct Answer: C

QUESTION 4

Which of the following is an appropriate first step for a customer interested in moving to Zero Trust?

- A. Ask administrators to switch on the Zero Trust options and features of their current products.
- B. Secure the funding required to incorporate the new architecture into their existing networks.
- C. Set priorities by identifying the most valuable and critical assets and data on their networks.
- D. Request a statement of compliance from their IT vendors against the Zero Trust standard.

Correct Answer: D

QUESTION 5

A customer has enabled the Threat Prevention subscription on their Palo Alto Networks Next-Generation Firewall.

How will the performance of the firewall be affected if the customer also enables both WildFire and User-ID?

- A. The maximum throughput performance will be reduced, but the impact will vary based on the firewall model being used.
- B. Enabling User-ID will have no additional performance impact, but enabling WildFire will reduce throughput.
- C. There will be no additional performance impact to the firewall, and throughput will remain the same, regardless of firewall model.
- D. Enabling WildFire will have no additional performance impact, but enabling User-ID will reduce throughput.

Correct Answer: C

QUESTION 6

What file is needed from a firewall to generate a Security Lifecycle Review (SLR) report when creating the SLR?

- A. tech support file
- B. Panorama plugin registration file
- C. stats dump file
- D. system process core file

Correct Answer: C

QUESTION 7

In which two of the following scenarios is personal data excluded from protection under the General Data Protection Regulation (GDPR)?

Select 2 Correct Responses

- A. The data was automated as part of an information filing system.
- B. The data was generated in the course of a purely personal or household activity.
- C. The data will be used for the prevention of criminal offenses.
- D. The data is related to a person's economic or cultural identity.

Correct Answer: AC

QUESTION 8

The Security Operations Center (SOC) has noticed that a user has large amounts of data going to and coming from an external encrypted website. The SOC would like to identify the data being sent to and received from this website.

Which Secure Sockets Layer (SSL) decryption method supported by Palo Alto Networks would allow the SOC to see this data?

- A. Forward Proxy
- B. Web Proxy
- C. Certificate Proxy
- D. Inbound Proxy

Correct Answer: A

QUESTION 9

Which traffic will be blocked when application-default service is set on a Security policy?

- A. SSH traffic on TCP/22
- B. HTTPS traffic on TCP/443
- C. HTTP traffic on TCP/81
- D. DNS traffic on UDP/53

Correct Answer: C

QUESTION 10

Which architecture is unique to Palo Alto Networks and results in no additional performance overhead when enabling additional features?

- A. multi-pass
- B. multiple-core threaded
- C. single-pass
- D. no-pass

Correct Answer: C
