Following Questions and Answers are all new published by UiPath Official Exam Center

QUESTION 1

The return value of the Get Transaction Item Activity is of the following type:

A. Object

B. String

C. QueueItem

D. List

E. List

Correct Answer: C

QUESTION 2

Please choose the correct statement about selectors in UiPath.

A. Selectors in UiPath are case-sensitive by default. You cannot change the case sensitivity of attributes.

B. Selectors in UiPath are case-insensitive by default. You can change the case sensitivity of attributes.

C. Selectors in UiPath are case-insensitive by default. You cannot change the case sensitivity of attributes.

D. Selectors in UiPath are case-sensitive by default. You can change the case sensitivity of attributes.

Correct Answer: D

When a selector is built, the Case-Sensitive property makes it possible to identify elements by also taking into consideration the casing of an attribute\'s value. In order to enable identification of attributes by casing, the case-sensitive() attribute

needs to be included in the selector, in the tag of the target attribute:

casesensitive:=\\'false\\'

Enables you to validate a selector by also including an attribute\'s value casing. By default, the value of this option is set to true. If set to false, the casing of the attribute\'s value is not taken into account.

Example:

The following selector will be recognized by UI Explorer:

If capital letters are changed to lowercase, UI Explorer will not recognize this selector:

However, you can set to ignore case sensitivity of the title attribute in the following way:

Describe how Tags and Attributes, Dynamic Selectors, Anchor Base, etc. are used in UI Explorer to create a robust selector in the Default, Active Accessibility, or UI Automation frameworks

QUESTION 3

A developer is running a process in UiPath Studio based on Robotic Enterprise (RE) Framework 2021.10. One asset defined in the project does not exist in the Orchestrator folder provided in the Config.xlsx file.

What is the behavior at runtime?

A. A warning message stating that the asset is missing is logged and then the process is stopped.

B. No exception is thrown and neither will a message be logged, the process continues.

C. The process throws an exception in the Initialization state because the asset is not found, then the process is stopped.

D. A warning message stating that the asset is missing is logged and then the process continues.

Correct Answer: C

QUESTION 4

How can you find all anchor elements in a web page?

A. Using the Find Relative Element Activity

B. Using the Get Ancestor Activity

C. Using the Find Element Activity

D. Using the Find Children Activity

Correct Answer: D

QUESTION 5

After adding an Invoke Workflow File activity and selecting the workflow to invoke, you need to:

A. Click Import Arguments, and then bind the arguments to the local variables or to some default values

B. Click Edit Arguments, and then bind the arguments to the local variables or to some default values

Correct Answer: A

QUESTION 6

A developer runs the process in Debug mode. Which panel allows to see, which activity will be executed next?

A. The Immediate Panel

B. The Call Stack Panel

C. The Locals Panel

D. The Watch Panel

Correct Answer: B

The Call Stack panel displays the next activity to be executed and its parent containers when the project is paused in debugging. The panel is displayed during execution in debug mode and it gets populated after using Step Into, Break, Slow Step, or after the execution was paused because an error or a breakpoint was encountered.
