QUESTION 1

Which Veritas Storage Foundation and High Availability Solutions 6.0 for Windows installation option facilitates the split of a dynamic disk group?

- A. Volume Replicator (VVR)
- B. Fast Failover
- C. Global Cluster Option (GCO)
- D. FlashSnap

Correct Answer: D

QUESTION 2

An administrator is designing a cluster in a Microsoft Windows environment with three systems. Two of the systems are on the 192.168.4.0 Class C public network. The third system is on the 192.169.0.0 Class B public network. The administrator needs to have Microsoft Windows clients access the service groups independent of the system on which they are running.

Which feature or change must be incorporated into the design?

- A. use the Lanman resource in each service group
- B. change the servers so they all reside on the same subnet
- C. change the servers so they all use the same subnet class
- D. use the subnet resource in each service group

Correct Answer: A
