QUESTION 1

Under what circumstance should the Preferred Networks settings be altered?

- A. When it is necessary to limit the maximum throughput of traffic going from source to target data mover services
- B. When it is required to keep production storage availability from being impacted by the load from backup tasks
- C. When the network capacity is not sufficient to support multiple data transfer connections
- D. When the backup traffic must be routed to a specific network

Correct Answer: D

Reference https://helpcenter.veeam.com/docs/backup/hyperv/select_backup_network.html?ver=95

QUESTION 2

Which component is used by Veeam Backup and Replication to transfer data from the Veeam Backup Proxy to an HPE StoreOnce deduplication appliance?

- A. Proxy appliance
- B. HPE Catalyst
- C. Gateway server
- D. VeeamZIP
- E. Backup repository

Correct Answer: C

Reference https://helpcenter.veeam.com/docs/backup/vsphere/deduplicating_appliance_storeonce.html?ver=95

QUESTION 3

Which of the following is a prerequisite for installation of the Veeam plug-in for vSphere Web Client?

- A. Veeam ONE
- B. Veeam Backup and Replication
- C. Veeam Management Pack for System Center
- D. Veeam Backup Enterprise Manager

Correct Answer: D

QUESTION 4

Veeam Backup and Replication is currently configured to back up different workloads:

Windows VMs on vSphere and Linux VMs on vSphere. A secondary copy of all the backups including transaction logs must be created.

Which of the following backup copy job configurations is the simplest?

- A. A single "periodic copy" backup copy job
- B. A single "immediate copy" backup copy job
- C. Two "immediate copy" backup copy jobs
- D. Two "periodic copy" backup copy jobs

Correct Answer: B

Explanation: According to the Veeam Backup and Replication best practice guide¹, a new copy job mode was added called immediate copy. This mode immediately starts the backup copy job as soon as restore points appear in the repository.

It also provides the ability to copy SQL and Oracle log backups which is not possible with traditional periodic backup copy¹².

Therefore, if you want to create a secondary copy of all the backups including transaction logs, you should use an immediate copy backup copy job. The simplest configuration would be a single immediate copy backup copy job for all workloads (option B)

QUESTION 5

Veeam Backup and Replication in-line deduplication is most helpful when: (Choose two.)

- A. VMs that need to be backed up are highly transactional
- B. VMs are created from the same template and Per-VM Backup Files are disabled
- C. VMware vSphere Changed Block Tracking is disabled
- D. VMs that need to be backed up have a lot of free space on their disks

Correct Answer: BD

QUESTION 6

Which of the following jobs can use a Scale-Out Backup Repository as a target? (Choose two appropriate options)

- A. A backup job
- B. A replication job (for storing replica metadata)

- C. A configuration backup job
- D. A VM copy job
- E. A backup copy job

Correct Answer: AE

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/backup_repository_sobr.html?ver=95

QUESTION 7

Which of the following is the extension of a Veeam Backup and Replication configuration backup file?

- A. .bco
- B. .vbk
- C. .vbm
- D. .cbo
- E. The file extension is specified in the configuration backup settings.

Correct Answer: A

QUESTION 8

Which statements regarding various product features are true? (select three)

- A. 1-Click-Restore is used in Backup Browser and Veeam Explorers to allow restore to original location.
- B. 1-Click-Restore is used in Enterprise Manager
- C. Standard Edition allows browsing and searching for files in both current and archived backups (moved to tape)
- D. All editions (incl. free edition) offers tape functionality
- E. You can clone existing jobs and edit their settings from Enterprise Manager web UI

Correct Answer: ABC

QUESTION 9

If a VM is restored to its original location via Full VM restore while the original VM still exists, the original VM will be:

- A. Renamed automatically
- B. Copied to another location specified in the settings
- C. Backed up and stored at the same location

D. Deleted

Correct Answer: D

QUESTION 10

The 3-2-1 backup strategy refers to which of the following?

- A. 3 copies of data, 2 copies onsite, 1 copy offsite
- B. 3 copies of data, 2 media types, 1 copy offsite
- C. 3 copies of data, 2 locations to store them, 1 media type
- D. 3 media types, 2 locations to store them, 1 copy of data

Correct Answer: B

<https://www.veeam.com/blog/how-to-follow-the-3-2-1-backup-rule-with-veeam-backup-replication.html>

QUESTION 11

A virtual machine in your environment has been hit by a virus. You need to restore the virtual machine as fast as possible. At the same time, you need to make sure that any dormant virus on the backed up virtual machine is detected. What restore method should you use when recovering to a new location?

- A. Instant VM Recovery with "staged restore"
- B. Instant VM Recovery with "secure restore"
- C. SureBackup
- D. Virtual disk restore

Correct Answer: B

Reference: https://helpcenter.veeam.com/docs/backup/em/em_disk_restore.html?ver=100

QUESTION 12

A company is required to have a daily backup with a retention of at least six weeks. The backups are running every eight hours during the day. From the options provided, what backup job would you advise based on their SLA and best practices?

- A. Forever forward incremental backup, with default job settings enabled
- B. Forever forward incremental backup, with a retention of 42 restore points, savings six weekly full backups
- C. Forever forward incremental backup, with a retention of 42 restore points
- D. Forward incremental backup with weekly synthetic full backups and a retention of 42 days

Correct Answer: D

QUESTION 13

Which of the following statements are true regarding backup copy jobs in Veeam Backup and Replication? (Choose two.)

- A. The backup copy job creates a forever forward incremental backup chain
- B. The backup copy job creates a single file with multiple restore points included within for archival purposes
- C. During the backup copy job process, a VM snapshot is created for consistency
- D. Retention settings maintain the desired number of restore points as well as offer optional GFS for archival purposes
- E. Backup copy jobs copy entire VBK, VIB, or VRB files from the source backup repository to the target backup repository

Correct Answer: AD

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/about_backup_copy.html?ver=100

QUESTION 14

Which backup method will always produce a full backup as the most recent restore point?

- A. Forever Forward Incremental backup
- B. Reverse Incremental backup
- C. Forward Incremental backup
- D. Forward incremental with transform

Correct Answer: B

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/reversed_incremental_backup.html?ver=95

QUESTION 15

Which Dell EMC SAN storage systems are compatible with the Backup from Storage Snapshots feature in Veeam Backup and Replication? (Choose two.)

- A. Dell EMC ISILON
- B. Dell EMC Data Domain
- C. Dell EMC VNX, VNXe and VNX2
- D. Dell EMC Unity

Correct Answer: CD
