QUESTION 2

Which of the following conditions require Microsoft VSS rather than VMware quiescence? (Choose two.)

- A. You want to enable point-in-time restore for a Microsoft SQL server
- B. The VM in question is a Linux VM
- C. You want Veeam to truncate backup logs for your Exchange server
- D. You want to use reverse incremental backup mode
- E. The backup data is to be encrypted

Correct Answer: CD

QUESTION 3

Which statements regarding various product features are true? (select two)

- A. All editions offer task automation.
- B. All paid editions offer scheduled incremental backup jobs of vCloud Director VM(s).
- C. Universal Application-Item Recovery is only available in Enterprise and Enterprise Plus.
- D. Backup Copy job to remote location over WAN is only supported in Enterprise Plus
- E. All editions are installed with the same setup file.

Correct Answer: CE

QUESTION 4

Which of the main advantage of using the Backup from Storage Snapshots feature?

- A. Does not create VMware snapshot(s)
- B. Saves space in the repository
- C. Speeds up the backup process
- D. Decreases the amount of time the VM is running on a VMware snapshot

Correct Answer: C

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/backup_from_storage_snapshots.html?ver=95

QUESTION 5

Which predefined test performed on the Application Group during verification differs between SureReplica and SureBackup jobs?

- A. The application test is different for SureBackup and SureReplica
- B. There is no heartbeat test for SureReplica
- C. There is no difference
- D. There is no ping test for SureReplica

Correct Answer: C

QUESTION 6

Where is the Extract utility command line version for Linux located?

- A. All major Linux distributions include an Extract utility compatible with Veeam Backup and Replication backup files.
- B. %PROGRAMFILES%\Veeam\Backup and Replication\Backup
- C. It is available upon request - open a support case.
- D. There is no Linux version of the Extract utility.
- E. It is a separate download from <http://www.veeam.com/downloads>

Correct Answer: B

QUESTION 7

Which of the following statements is true regarding the Veeam Cloud Connect feature?

- A. Veeam Backup and Replication creates its own cloud for storing VM data
- B. Both service providers and tenants have to own a special type of Veeam Cloud Connect license
- C. Veeam Backup and Replication offers data encryption capabilities to protect data stored in the cloud
- D. Backup Copy Jobs, utilizing a Cloud Repository as a source Backup Repository, are supported

Correct Answer: D

QUESTION 8

Which of the following should be taken into account when estimating the amount of disk space necessary to store backups? (Choose two.)

- A. Type of a disk (thick or thin)
- B. Total size of used data for the VMs being backed up
- C. Veeam Backup and Replication edition
- D. Hypervisor and host version
- E. Retention period for backups

Correct Answer: BE

QUESTION 9

Which statements regarding Guest OS File Recovery are true? (select two)

- A. For FAT, NTFS and ReFS the built-in file-level restore functionality is used.
- B. MultiOS file-level recovery allows reading data from ReiserFS, JFS, JFFS2 and XFS
- C. MultiOS file-level recovery allows reading data from 18 different file systems.
- D. When performing recovery through the FTP server, you can recover files with correct permissions.
- E. When performing recovery directly to a Linux host, you can recover files with correct permissions.

Correct Answer: AD

QUESTION 10

When is Veeam-provided (software level) encryption used for tape media?

- A. If the original backup file is not encrypted, but the administrator has enabled encryption
- B. If the "Tape protection" option is enabled by the administrator
- C. If the hardware encryption is disabled at the tape device level or not supported, but the administrator has enabled encryption
- D. By default for all of the tape jobs

Correct Answer: C

QUESTION 11

Which of these statements regarding Backup Jobs are true? (select two)

- A. If a new VM is added to a VM container after a backup job is created, the job will automatically be updated to include the added VM.
- B. During every job run, Veeam Backup and Replication checks disk space on the destination storage.
- C. It is not possible to define VM backup order.
- D. Veeam offers a free hosted SMTP server to send out e-mail notifications
- E. It is possible to manually start and complete backup job outside backup window.

Correct Answer: AB

QUESTION 12

Which of the following applications should be backed up using pre-freeze and post-thaw scripts to ensure transactional consistency? (Choose the 2 appropriate options)

- A. Microsoft Active Directory
- B. Microsoft SQL Server
- C. MySQL
- D. Lotus Domino
- E. Microsoft Exchange

Correct Answer: AB

QUESTION 13

During the SureBackup job execution, redo logs are created for each verified VM. Where are the redo logs for the job located?

- A. In a special folder of the Backup and Replication server

- B. In the backup file itself
- C. On the datastore specified in SureBackup job settings
- D. On the backup repository
- E. On the datastore specified in Virtual Lab settings

Correct Answer: D

QUESTION 14

Which statements regarding initial configuration are true? (select two)

- A. Linux based backup repository implements vPower NFS server
- B. Microsoft Windows based backup repository implements vPower NFS server
- C. VMware Backup Proxy has Encrypt LAN traffic in network mode enabled by default.
- D. SMBv3 clusters are supported - Standalone SMBv3 servers are not supported.
- E. Managed Linux servers must have SSH and Perl installed.

Correct Answer: BE

QUESTION 15

Which of the following restore options is NOT available to an administrator account in Veeam Backup Enterprise Manager?

- A. Full VM Recovery
- B. Application Items Recovery
- C. File Level Recovery
- D. Instant Recovery

Correct Answer: D
